India

uday06542@gmail.com

Senior Software Engineer with 14 years of experience building scalable backend systems and distributed data platforms. Strong expertise in Python, Java, REST APIs, and database systems with hands-on experience in AI/ML integrations, data pipelines, and cloud-based architectures. Designed high-performance systems, mentored teams, and delivered more than 6 production-grade applications resulting in improved efficiency or reliability.

Work Experience

Principal Member of Technical Staff

Oracle India Private Limited | India

Jul 2018 - Present

- Designed and developed scalable backend services and APIs for enterprise SaaS applications using Python and Java-based microservices.
- Built and maintained RESTful APIs that enabled integration across distributed systems and data pipelines, resulting in improved data accessibility and streamlined workflows.
- Developed and optimized data pipelines for analytics systems, improving processing efficiency and data retrieval speed by 40%.
- Applied object-oriented design principles, data structures, and system design patterns to build maintainable systems.
- Led code reviews and enforced best practices for clean, testable, and efficient code.
- Implemented unit testing strategies improving code reliability and reducing production issues.
- Collaborated with cross-functional teams using Git-based workflows for version control and CI/CD pipelines.
- Mentored engineers and improved onboarding efficiency by 60% through structured knowledge-sharing.

Member of Technical Staff – R&D

EdgeVerve Systems Limited (Infosys Group)

Jun 2015 - Jul 2018

- Developed distributed systems for fraud detection processing up to 1.2M transactions per second.
- Built data processing pipelines integrating machine learning components using Python.
- Designed and implemented scalable backend services and APIs for high-throughput systems.
- Worked with big data technologies and event-driven systems using Kafka.
- Collaborated with stakeholders to deliver production-ready solutions aligned with business requirements.

Senior Systems Engineer

Infosys Limited

Feb 2012 - Jun 2015

- Developed backend applications using Java and REST APIs for enterprise financial systems.
- Implemented database interactions and optimized SQL queries for performance.
- Participated in Agile development cycles and collaborated with cross-functional teams.

Education

Nagpur University (RTMNU)

Electronics & Telecommunication | Bachelor of Engineering | India

Skills

Hard Skills

Python, Java (8, 17–21), JavaScript, Flask, FastAPI, Spring Boot, Spring MVC, Hibernate, PostgreSQL, Oracle DB, MySQL, NoSQL, Data Modeling, PySpark (conceptual), Data Pipelines, ETL Systems, REST APIs, Microservices Architecture, unittest, pytest, Unit Testing, Code Reviews, Git, Bitbucket, AWS, Oracle Cloud, CI/CD, Docker (basic), HTML, CSS, JavaScript, Data Structures, OOP, System Design, Distributed Systems, Asynchronous Processing, NLP, Word2Vec, RAG, Generative AI, Django

Soft Skills

Mentoring, Collaboration, Knowledge-sharing, Problem-solving, Communication

Key Projects

Data Pipeline and Analytics Platform

- Designed and implemented ETL data pipelines for large-scale analytics systems.
- Enabled efficient data ingestion, processing, and monitoring across distributed systems.

Fraud Detection System

- Built high-throughput distributed system processing 1.2M+ transactions per second.
- Integrated machine learning models using Python for anomaly detection.

AI-driven Chatbot System

- Developed NLP-based chatbot using Word2Vec and intent classification techniques.
- Integrated backend APIs for real-time response and user interaction.

Certifications

Software Product Management – University of Alberta

Software Processes and Agile Practices – University of Alberta
